

Reunited. Platform Guide

How to find, claim, and collect lost items at school — from the website to the Lost & Found desk.

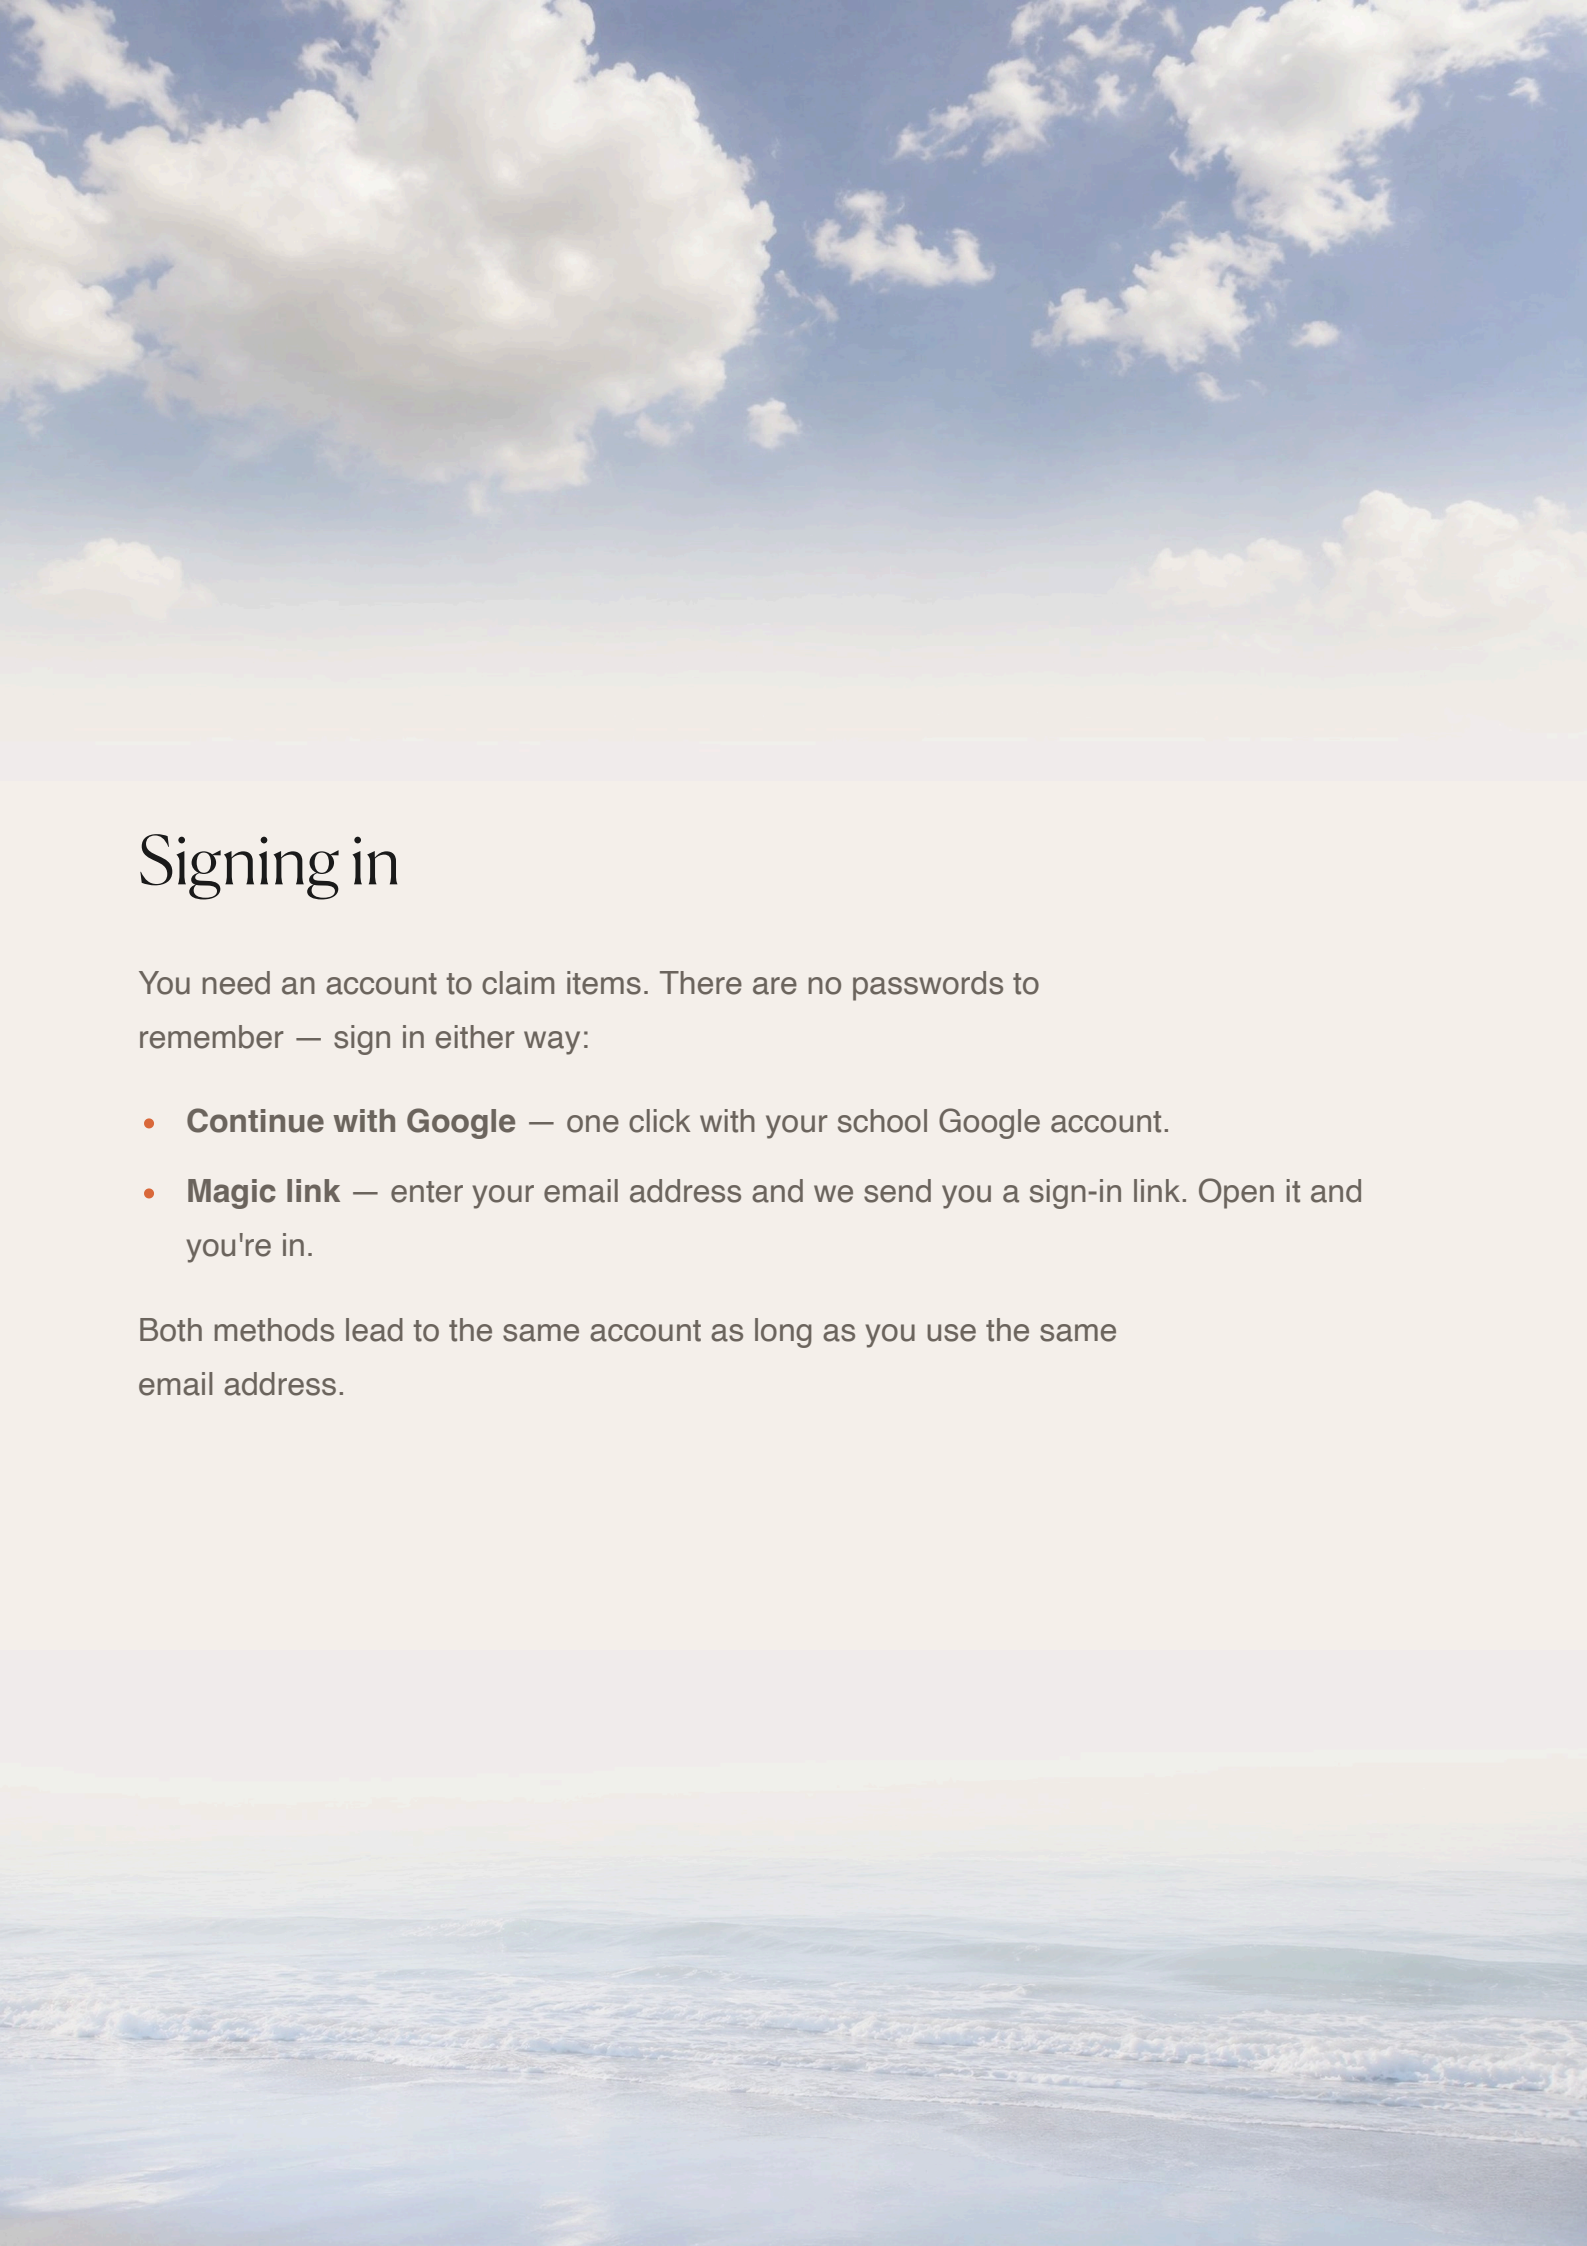

How Reunited works

Reunited is the school's lost and found, online. Items handed in at the Lost & Found desk are photographed and listed on the site, where anyone can search for them.

1. **Search** for the item you lost — by name, type, location, or the date you lost it.
2. **Claim** it by describing details only the owner would know.
3. **Collect** it from the Lost & Found desk using the claim code you receive.

Every completed claim is also listed on the public Claim Log page, so the process stays transparent.

Signing in

You need an account to claim items. There are no passwords to remember — sign in either way:

- **Continue with Google** — one click with your school Google account.
- **Magic link** — enter your email address and we send you a sign-in link. Open it and you're in.

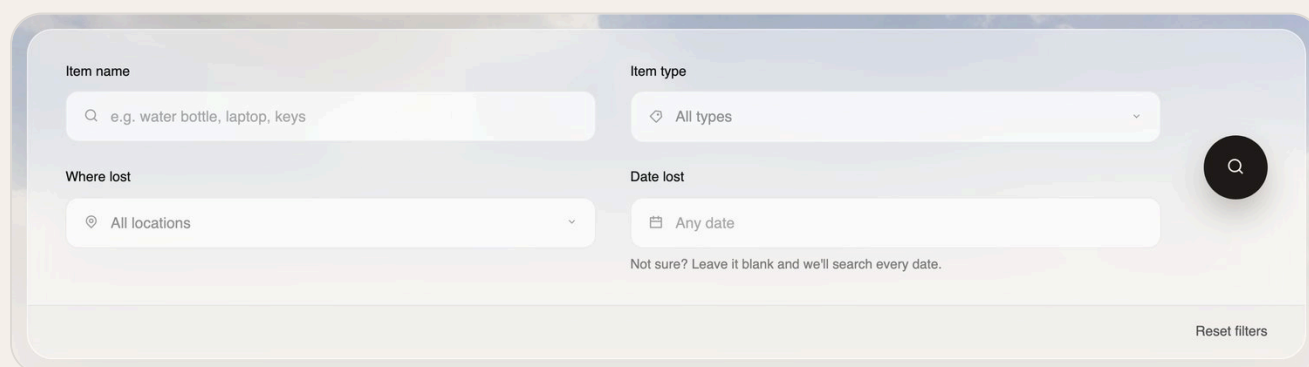

Both methods lead to the same account as long as you use the same email address.

Finding your item

On the **Search** page, describe what you lost. You can combine an item name with filters for type, location, and the date it went missing.

Search is AI-assisted: a description like "blue bottle with a panda sticker" is matched against item descriptions, not just titles, so nearby matches surface even if the wording differs.

Results show a photo, where the item was found, and when. Open any result to see its full details.

A semi-transparent search interface overlay is shown against a background of a beach and sky. The interface contains four input fields: 'Item name' with a magnifying glass icon and placeholder text 'e.g. water bottle, laptop, keys'; 'Item type' with a diamond icon and 'All types'; 'Where lost' with a location pin icon and 'All locations'; and 'Date lost' with a calendar icon and 'Any date'. A circular search button with a magnifying glass icon is positioned to the right of the filters. Below the 'Date lost' field is the text 'Not sure? Leave it blank and we'll search every date.' At the bottom right of the overlay is a 'Reset filters' link.

Claiming and collecting

Found your item? Press **Claim** and describe features only the owner would know — markings, contents, scratches. Staff review this before approving the claim.

1. Submit the claim with your verification details.
2. You receive a **claim code** on screen and by email.
3. Show the code at the Lost & Found desk to collect your item.

Please collect within the pickup window mentioned in your email — we send a reminder before the deadline. If an item isn't collected in time, it returns to the shelves and becomes claimable again.

Your dashboard

The Dashboard keeps everything about your account in one place:

- **Notifications** — claim approvals, review updates, and pickup reminders.
- **My Claims** — every claim you've made, with its current status and details.
- **Settings** — update your name and choose whether to receive email notifications.

Reporting lost items yourself is coming soon; for now, items are listed by the Lost & Found desk.

Questions or problems

If a claim is taking long, a code didn't arrive, or something on the site isn't working, use the **Contact** form on the home page — messages go straight to the team.

Thanks for using Reunited.
